CIS*4030 – Mobile Computing – Project Milestone 2 (M2) Specification

Through this Milestone, you will be demoing your initial interface design during class and discussing any adjustments made from Milestone 1 (Note: I may not remember your application so describe your app and any changes with the assumption that I don't remember anything from Milestone 1).

M2 Weight and Grading: Milestone 2 is worth 15% and this will be graded on an in-class demo of your initial interface implementation.

M2 Demo Device Details: You must demo your application on a simulator running on your computer or a mobile device for this Milestone.

M2 In-Class Demo: The demo will be 3-5-minutes and must cover the following:

1) Introduce team members and describe the roles you will all fill for the demo.

2) A brief recap of your project idea and the problem you are solving.

3) Details of future tasks for your project and what you have adjusted since M1's presentation (e.g., have you chosen to eliminate any features for M3).

4) A walkthrough of the application's main features (i.e., this is where I should be given the chance to test your application).

Finally, after I test the application there will be 2 minutes for questions and feedback on the design.

M2 Demo Roles: The demo will be done just with your group (i.e., you don't have to present in front of the whole class). During the demo, please assign roles that each team member will fill to ensure everyone participates. For example, these roles could be split so that one member presents the project's background (i.e., parts 2 & 3), another facilitates the walkthrough of the app, and a third is recording notes throughout the demo.

M2 In-Class Participation: To ensure that all of you aren't waiting for me the entire class time on the day you do your demo, I would like to encourage groups (Note: Please only provide feedback on days you are not demoing) to provide feedback to other groups interface designs. For every group your team provides feedback for, I will provide a 1% bonus mark for the whole group's Milestone Grade (up to a max of 10% total or feedback on ten groups). To receive this bonus mark you will need to collect the group numbers for all groups you provide feedback for and email me as a group after the demo period is over (after March 15th, 2024).

M2 Demo Dates: Milestone 2 will be done in class on: March 11, 13, and 15. If you have any conflicts with any of the dates mentioned please email me (geddesc@uoguelph.ca) before Friday March 1st, 2024, and I will accommodate all requests as best as possible.
